

# POLLY-CUP<sup>®</sup>

## POLYURETHANE PIPELINE SCRAPER CUPS

\*The Knapp Polly-Cup<sup>®</sup> incorporates a heavy cross-section with a wide sealing lip. These two unique features increase the wear life of Knapp Polly Cups and provide additional miles of service, thus reducing replacement costs.

\*Polly-Cups are available in two designs - the solid urethane Polly Cup and the steel-belted Polly-Cup. The steel belted design incorporates belted steel bristles cast into the wear surface of the cup so that the original point of contact with the pipe is on the metal tips.

\*In every way, Knapp Polly-Cups meet the toughest challenges at a price you can afford.

\*These tough cups offer superior hydrocarbon resistance, little if any significant swelling and excellent abrasion resistance.

\*Custom designs and formulations available on request. Please contact the factory.

The Polly-Cup is available in many different formulations of Ultrathane, Knapp's Ultra Performance urethane, which are fine-tuned for the job requirements. Ultrathane's superior elastomeric physical characteristics in tear and tensile strength provide the ultimate in long wear and scraping ability. Contact the factory for specific Ultrathane formulation recommendations suited for your line.

Polly-Cup and Ultrathane are trademarks of Knapp Polly Pig, Inc.
