

TOTAL WIRE BRUSH POLLY PIG (TWB) (SUPER JAVELINA)

Medium-density foam body
(5-8 lb/ft³ - 80-128 kg/m³)

The Knapp Total Wire Brush Polly Pig(Super Javelina) is totally coated with wire brush straps in a slight spiral pattern. The Super Javelina is used to remove aggressive scale and to run long distances in pipelines. The pig is capable of negotiating elbows, wyes and tees in the line, but caution should be taken before running this pig in a line with any restrictions or reductions in diameter. The Super Javelina Polly Pig is manufactured using Knapp's exclusive K-Lite™ polyurethane foam (5-8 lb/ft³ density); this tough, hi-flexibility, open-celled foam is particularly suited for the rugged environment encountered in modern pipelines. Contact Knapp or a qualified representative before using this pig in a line where reductions are present.

*Note: The TWB Polly Pig should not be used in non-metallic piping as it will physically scratch the pipe wall, creating an anchor point for future scale or deposit formation
